## RECENT PROJECTS

### HabsGrudgeBot, Reddit Bot | *Personal*

JANUARY 2022

Streams Reddit comments searching for target strings. Replies with a comment accordingly. Includes a front and back end for handling data.

Technologies used: Python, JavaScript, PRAW, Node.js, PostgreSQL

### NASA Image of the Day, Android App | *Algonquin College*

AUGUST 2021

Pulls JSON data from NASA's APOD API, allowing users to view and save daily images, and explore past images via calendar.

Technologies used: Java, Android Studio

### DrawnToYou, Web App | *Algonquin College*

AUGUST 2021

Allows users to upload and peruse portrait art through image reels.

Technologies used: Java servlets, JSP, CSS, MySQL

## EDUCATION

### Computer Programming

*Algonquin College of Applied Arts and Technology | Ottawa*

GRADUATED WITH HONOURS | DECEMBER 2021 (GPA 3.8/4)

Application programming using Java, HTML, CSS, JavaScript, SQL, and PHP. Object-oriented analysis and design, operating systems, and coding in integrated environments. Learned to properly debug, test, and maintain code, as well as database design and maintenance.

## EXPERIENCE

### Moose McGuire's | *Bartender*

SEPTEMBER 2020 - DECEMBER 2021

Friendly and efficient customer service to build and maintain a loyal customer base. Efficient communication, time management and teamwork in order to maintain smooth operation of the restaurant.

### The Acadian House | *Manager/Bartender*

JUNE 2011 - DECEMBER 2020

Maintain a fresh and inviting atmosphere, create & update drink/menu items. Team management, conflict resolution, task delegation, training of staff.

## LANGUAGES & TECHNOLOGIES

Java, Python, JavaScript, HTML, CSS, PHP

MySQL, Oracle, SQL Server, PostgreSQL, MongoDB, Neo4j

## CONCEPTS, TOOLS & METHODOLOGIES

Object-oriented programming,  
Agile development,  
Virtualization,  
Microservice architecture,  
Docker containerization,  
Version control using Git
